REHACARE CHINA 2024, the International Trade Fair for Rehabilitation and Care, concluded on a high note at Suzhou International Expo Center. Hosting over 100 companies from the rehabilitation aids sector, the event showcased innovative technologies across diverse fields such as assistive living, hearing devices, elderly care, and more, drawing an attendance of 11,320 industry professionals and individuals seeking rehabilitation services. The fair emphasized the growing importance of rehabilitation services due to an aging population and increasing prevalence of disabilities and chronic conditions.

Ms. Evian Gu of Messe Düsseldorf (Shanghai) highlighted the fair's role in fostering innovation and international collaboration in rehabilitation, building on the legacy of its German counterpart, REHACARE INTERNATIONAL.

### Tech Empowers Disabled People, Shaping a Brighter Future

The event also featured a new "Smart Rehabilitation Zone" with pioneering technologies like exoskeletal systems and smart mobility aids, underlining the fair's commitment to technological advancement.

Advancements in artificial intelligence have revolutionized hearing aid technologies, greatly enhancing auditory experiences for individuals with hearing impairments. At REHACARE CHINA 2024, companies like Sound link, Boin Hearing, and Leeyin showcased various hearing solutions—ranging from mobile service vehicles to bone conduction aids and behind-the-ear models—drawing significant visitor interest.

Prominent speakers, including Mr. Gong Zezhong of the Audiology Development Foundation of China, praised the event's expanding influence,

particularly in hearing rehabilitation. Exhibitors like Soft Robot Technology and Beijing Galaxy Circumference Technology shared positive feedback on the quality of interactions and opportunities for business growth facilitated by the fair.

### Enjoying Sports, Celebrating Inclusion

REHACARE CHINA 2024, in collaboration with Jinchang Charity, established a “Sports Experience Center for People with Disabilities” during the Paris Paralympics, featuring sports like wheelchair races and table tennis. This initiative not only allowed participants to enjoy sports and boost their confidence but also promoted societal acceptance and inspired rehabilitation professionals.

REHACARE CHINA 2024 also served as a platform for professional forums and academic seminars where experts discussed topics like neurotechnology and community-based rehabilitation, further contributing to the sector’s development. With plans already underway for REHACARE CHINA 2025, the event promises continued growth and innovation in the rehabilitation industry.

The next REHACARE CHINA will take place at the Suzhou International Expo Center from August 20-22, 2025. We look forward to seeing you again!

## Organizers background information

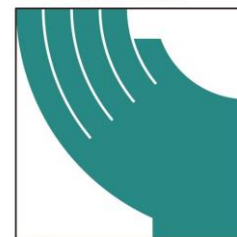

### Messe Düsseldorf (Shanghai) Co., Ltd.

As one of the world's top exhibition organizers, the Messe Düsseldorf Group is excellently positioned in the growth region of Asia: This includes five subsidiaries in four of the world's largest economies: China, India, Japan and ASEAN/Southeast Asia. The regional hub "Messe Düsseldorf for Asia" (MDfA) unites the subsidiaries in one centrally coordinated network. This efficient structure is designed to promote even more growth in Asia and leverage feedback effects for the world-leading trade shows in Düsseldorf. Customers will benefit from offerings in Asia that are tailored to regional needs, central points of contact and even stronger business platforms - both in Asia and Düsseldorf, Germany. For more information about MDfA, please visit <https://www.md-for-asia.com/>
